

Fibre Optic & Cabling Services

Complimenting our Process Control, Network Integration and Communications divisions Applicon offer turnkey cabling system design, construct, test, certification and verification services.

Applicon

Fibre Optic & Cabling Services

ENGINEERED TECHNOLOGY SOLUTIONS

Applicon is an engineering company that has skills and experience in Process Control, Communications, Network Integration and Fibre Optic technologies. Our ISO 9001:2000 certification and engineering discipline means we approach technology using a structured and consultative methodology, to ensure the solution achieves the desired business outcomes.

FIBER OPTIC AND CABLING SERVICES

From Backbone to LAN our Fibre Optic & Cabling Services compliment our Networking Integration, Process Control and Communications engineering capabilities. Applicon has the skills and equipment to enable us to provide our clients with a complete turnkey solution for any sized enterprise.

With the obvious synergies between the active equipment in a network and the plant and infrastructure that carry the data between nodes, the physical layer plays an important part in any network deployment. Whether it be an SME in a metropolitan area or a resource project at a remote site, Applicon is able to provide the full range of services to ensure comprehensive coverage of all physical layer technologies.

Testing, Certification, Commissioning and Results Verification are all services we deliver to ensure our clients physical plant is able to perform its function within the overall communications infrastructure.

Fibre Optic Services

ISO 9001:2000 Certified

- Cabling Plant Design
- Cable Ploughing, Trenching, Hauling and Placement
- Building Lead-ins and Civil Construction
- Fusion Splicing and Cable Termination
- OTDR and Insertion Loss Testing
- Air Blown Fiber Design and Construction
- Fiber Optic Certification and Commissioning
- Results Verification
- Emergency Breakdown Repair
- Carrier Services

Structured Cabling Services

- Cabling Plant Design
- Cat5e, 6 & 7 for Voice and Data Services on the LAN
- PABX Installations & Telephone Moves, Adds & Changes
- Electrical Cabling, Maintenance and Installation
- Industrial Ethernet
- IP Vision Systems
- Instrumentation Cabling
- Results Verification
- Testing, Certification and Commissioning
- Emergency Breakdown Repair
