

## High Voltage Installations and Essential Services

Applicon Australia is now offering HV Transformer installation & commissioning and HV cable jointing and terminating as a compliment to our Electrical Engineering and Process Control services

# Applicon

## High Voltage Installations and Essential Services

### ENGINEERED TECHNOLOGY SOLUTIONS

Applicon is an engineering company that has skills and experience in Process Control, Communications, Network Integration, Fiber Optic and Electrical engineering technologies. Our ISO 9001:2000 certification and engineering discipline means we approach technology using a structured and consultative methodology, to ensure the solution achieves the desired business outcomes.

### Essential Services

Applicon is providing services across a number of disciplines in the Essential Service Area.

- HV/LV Power
- Waste Water Treatment
- Potable Water and Dewatering Systems
- Renewable Energy
- Remote Monitoring and Control
- Power Generation

Applicon is able to provide a turnkey solution from Design, Procurement, Installation, Commissioning and Maintenance. We have in house resources and a full set of related Quality and OSH procedures.

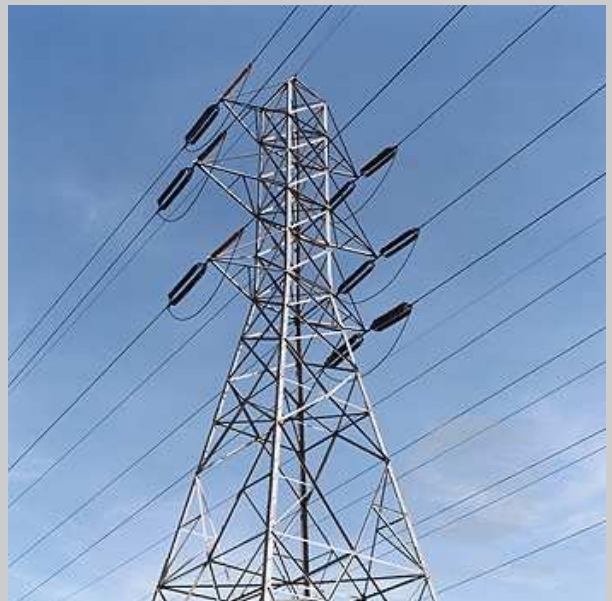

We have experience in Mining and Resources, Powerstations, HV and LV Residential and Commercial Distribution and Enterprise Plant and Manufacturing.

Quality of installation and workmanship are the key deliverables when engaging Applicon to perform work.
